CAPABILITIES STATEMENT

BOLTTEK

ABOUT BOLTTEK

Bolttek LLC is a premier cybersecurity firm dedicated to serving both government agencies and civilian clients with comprehensive information technology services. As a Service-Disabled Veteran-Owned Small Business, we provide specialized solutions to mitigate risks and defend against cyber threats. Our expertise encompasses network security, data protection, incident response, and more. We prioritize collaboration and long-term partnerships, working closely with clients to understand their unique challenges and develop customized strategies. Staying vigilant against emerging threats, we ensure robust cybersecurity defenses. Our commitment extends to supporting the military community and fostering diversity, empowering clients to confidently navigate the digital landscape and safeguard their valuable assets.

CORE COMPETENCIES

- **Security and Risk Management:** Identifying, assessing, and mitigating potential threats and vulnerabilities.
- **Asset Security:** Protecting valuable assets (data, hardware, software) from unauthorized access, theft, damage, or disruption.
- **Security Architecture and Engineering:** Designing frameworks and systems to protect digital assets, networks, and information.
- **Communication and Network Security:** Implementing measures to protect data transmission and system integrity from unauthorized access and tampering.
- **Identity and Access Management (IAM):** Securing access to sensitive systems and data. Security Assessment and Testing: Evaluating systems, networks, and applications to identify vulnerabilities.
- **Security Operations:** Continuous monitoring and responding to threats within an organization's network.
- **Software Development Security:** Ensuring secure software creation, deployment, and maintenance, protecting against vulnerabilities throughout the development lifecycle.

PAST PERFORMANCE

- **ICS NETT:** Executed Red and Purple Team operations for the Defense Counterintelligence and Security Agency (DCSA), enhancing offensive and defensive security. Designed penetration tests based on executive priorities and threat intelligence to protect critical assets.
- **U.S. Army Network Enterprise Command:** Provided desktop support, system administration, ITSM remedy, information assurance, and incident management. Developed best practices for risk reduction across enterprise applications, systems, and networks.
- **ByLight Professional IT Services:** Conducted IT audit assessments, risk analysis, and security assessments of globally deployed systems. Recommended risk mitigation solutions using manual and automated verification scans.
- **Security Operations:** Continuous monitoring, analysis, and response to threats and vulnerabilities within an organization's network.
- **ProCliq:** Assessed threats, risks, and vulnerabilities from emerging security issues, advising stakeholders on measures. Conducted offensive penetration tests to identify vulnerabilities in systems, networks, and applications.

DIFFERENTIATORS

At Bolttek LLC, we bring a profound commitment to serving both government agencies and civilian clients, understanding their unique security requirements and compliance regulations. This enables us to provide tailored solutions that align with their specific needs, ensuring the protection of sensitive information and digital infrastructure with the same level of dedication and expertise.
